

YOU CAN Manage Stormwater

Visit the Westmoreland Conservation District's website at www.wcdpa.com to find this guide and these fact sheets for stormwater solutions. Follow the **BMP Toolkit** quick link on the homepage.

The Homeowner's Guide to Stormwater Management walks you through a step-by-step evaluation of your property to determine the best method to control stormwater.

You Can Capture Rainwater in a Garden with this guide to designing and constructing a rain garden.

You Can Stabilize a Streambank with this guide to designing and planting a riparian buffer to control erosion.

You Can Plant a Tree with this guide to planting a tree to soak up stormwater.

You Can Drain a Wet Spot with this guide to designing and constructing a swale or linear drain to capture and redirect stormwater.

You Can Use Paving to Soak Up Stormwater with this guide to designing and constructing a permeable patio or driveway.

You Can Capture Rainwater to Use Later with this guide to constructing a rain barrel to save rainwater for garden irrigation.

You Can Control Your Roofwater with this guide to designing and constructing a drywell to capture a downspout.
